

YOUR WEBSITE. HERE'S THE **WHOLE DEAL.**

Before you pay a cent, here's exactly what you'll own, what it costs to keep (almost nothing), and the three easy steps to get it live. Short read, then you know everything.

Built for [Business Name]

Your website [businessname].com.au

THE DEAL in plain English

Your website. Built, finished, yours

\$1,500 one-off payment

Hosting, which keeps the site online

\$0. Free. Forever.

Your domain name, renews yearly on your card

About \$25-30 / yr

Small changes to the site. Just text Billy

Free for 12 months

NO MONTHLY FEES. NO CONTRACTS. NO CATCHES.

YOUR PART three things, full steps over the page

1

PAY FOR THE SITE

Bank transfer or the payment link I text you. Once it lands, the site is yours. You only ever pay this once.

2

REGISTER YOUR DOMAIN

Your web address, **in your name**, with your ABN, on your card. That way no one can ever hold your website over you.

3

ADD IT TO GOOGLE

Put your new website on your Google listing, so the people reading your reviews click straight through to it.

RATHER SORT IT OVER THE PHONE?

No dramas. Ring me and we'll knock over steps 2 and 3 together in ten minutes. That's part of the deal.

0447 132 774

STEP 2 · REGISTER YOUR DOMAIN

Your domain is your web address, like smithplumbing.com.au. **It gets registered in your name so you own it outright.** Some web companies keep it in their name so you can never leave. I don't do that.

- 01** Go to **ventraip.com.au**, an Australian registrar.
- 02** Search for **[businessname].com.au**. I've checked it's available.
- 03** Create an account with **your email**, and enter **your ABN** when it asks.
- 04** Pay with **your card**, about \$25-30 for the year. Turn auto-renew **on** so it never lapses.
- 05** Text me "done". I'll connect the domain to your website. Nothing more for you to do.

STEP 3 · ADD IT TO GOOGLE

Your Google listing, the box with your reviews and map pin, has no website button yet. Adding one takes a minute.

- 01** On your phone, search your business name on Google, signed in as the owner.
- 02** Tap **Edit profile**, then **Business information**, then **Contact**.
- 03** In the **Website** box, enter your new address exactly as I text it to you. Hit **Save**.
- 04** Google can take a day or two to show it. Prefer I do it? Ring me. You tap Accept on one invite, I add it, then **remove my own access**.

WHAT YOU OWN which is everything**Domain account, VentraIP**

Your email, your password, renewal on your card.

Hosting, Cloudflare

Login handed over. Hosting costs \$0. That's just what it costs.

Google Business Profile

Always was yours. I never keep access.

Your website files

Full copy sent to your email. Your site runs with or without me.

**FREE CHANGES
FOR 12 MONTHS**

New job photos, a new service, changed your number? **Text it to me and it's usually done the same day.** No invoice, no fuss, for your whole first year.

That's the whole deal. Nothing hidden, nothing ongoing, you own every piece of it. If you're happy, step 1 is all that's left. And when the site lands you a job, tell a mate about me.
